

The ABW6 and ABW6sp height adjustable wash basins are designed by Astor-Bannerman for users with special and progressively changing needs. The modular unit was developed with a team from Muscular Dystrophy UK and is the original height adjustable basin of its kind helping to encourage user independence.

With a 450mm height range and large basin surround, the ABW wash basin is suitable for wheelchair users and those who need extra support to move from sitting to standing. The basin is made from a light weight but durable heat resistant Corian® material which is never cold to the touch, nonporous, repairable and easy to clean making it perfect for domestic and public use.

Available in white or aqua, the ABW6 high low feature is operated by a simple handset control and the large lever taps, or infra-red touch free taps allow for unassisted use for those with limited arm movement.

Astor-Bannerman basins come with a large integrated mirror, which adjusts in height with the basin, and allows the carer and user to communicate easily as well as a shaver/electric toothbrush socket. The upgraded model (ABW6sp) allows the user to control the water and pop up waste from the handset and also features an LED strip light above the mirror making it the perfect addition to any accessible bathroom.

In addition, all ABW washbasins have a 3 year warranty\* for complete peace of mind. They are designed with the user in mind with a large free space under the basin with concealed plumbing which is discreet, looks great in any environment and accommodates all wheelchairs. There is also a safety cut out feature for extra safety when lowering.

The ABW6 and ABW6sp height adjustable wash basins have a 3 year warranty\* for complete peace of mind and are ideal for use in Changing Places facilities.

Large lever taps to help with limited movement

LED strip light with large mirror

Large ergonomic Corian® basin surround

Easy to use handset and shaver/toothbrush socket
