

The **BioBidet Supreme 1000/1000AA** offers the cleaning features of a full specialist shower toilet - but in a seat.

It's easy to convert a standard WC into an automatic wash dry toilet with the BioBidet when self-cleaning is difficult.

The BioBidet seat includes a patented 3 in 1 retractable, oscillating nozzle for maximum hygiene and the gives powerful posterior wash, anterior wash, turbo wash with aerated water and even has a pulsating massage setting. Once the cleaning cycle is complete, a stream of warm air provides gentle drying.

The BioBidet BB1000 with soft close lid and heated seat, has a built in filter which protects against lime scale build up, and a deodoriser which is automatically activated when the seat is occupied.

This wash/dry bidet is operated by a convenient remote control which allows the user to personalise functions including water temperature and pressure which can be operated independently or by the carer. However, here at Astor-Bannerman we are able to offer the BB1000AA which is specifically for assisted use in conjunction with a commode style BioChair.

The BB1000 and BB1000AA BioBidet toilet seats are WRAS approved, allowing them to be connected directly to the water supply.

For extra hygiene, the BioBidet automatically washes its cleaning nozzle before and after every use and is a cost effective wash/dry toilet solution which is suitable for use in Changing Places facilities.

Remote control for independent or assisted use

Warm air drying system

Oscillating 3 in 1 nozzle (turbo, posterior & anterior)

Fits to most toilets & comes with toilet raiser options

### STANDARD FEATURES
