

The Astor-Bannerman **Nivano CTE1** is a durable paediatric to adult height adjustable changing table with fixed padded top and comes in stretcher sizes of 1200mm to 1900mm x 700mm.

With a standard weight capacity of 135kg (21½st), and a 200kg (31½st) model available, this multi-purpose changing bench is made using high quality materials including a fixed padded top and stainless steel frame making it the perfect addition to any accessible wet room and Changing Places toilet, especially when combined with a hoisting system.

The Nivano wall mounted disabled changing bench has a travel range of 700mm (200mm to 900mm) and can easily lift a client from near floor level to a convenient working height for washing and changing at the touch of a handset button reducing the risk of back strain.

When not in use, the Nivano folds away very neatly and securely protruding just 220mm from the wall maximising the space in the room and features battery back-up for safe and stress free lowering in the event of a power failure.

Also available is an exceptional range of options including fold up guards, protective guard bumpers, tilting head/back rests and support wedges meaning that the electric Nivano changing table with padded top can be tailored just for your individual needs.

The Nivano wall mounted changing table has a 3 year warranty* for complete peace of mind and the adult sizes (from 1800mm) are ideal for use in Changing Places facilities.

Shown with optional guard and bumper

Optional fold away guard and padded bumper

Stows neatly against the unit when not in use

Fixed padded top in a range of colours

Lowers to just 200mm from ground level
