

The revolutionary **Senta mobile patient lifting system** offers a wide range of lifting options in just one single unit - changing quickly from seat lift, to leg-supporting seat lift to a full stretcher lift by the simple addition of special "wings". This give excellent flexibility to the care giver and eliminates the need for multiple lifts.

The swing away arms and commode aperture also offer a simple bathing system designed for all types of user from ambulant, sitting or recumbent. The part stainless steel construction means the Senta hoist is suitable for use in wet rooms and shower areas, and the polyurethane padding provides the client with a skin friendly and comfortable sitting/laying position.

The Senta is lightweight and easy to manoeuvre with 4 smooth double castors (2 lockable) which have a closed design to prevent a build-up of carpet fibres or other debris. This mobile hoist fits into many larger baths in any configuration, and is an ideal partner with our Avero bariatric bath.

The height adjustment feature is operated by a hand held remote control with service display, the Senta mobile hoist has a hinged 24 volt rechargeable battery which can be moved to the side in order to allow the unit to fit through smaller doorways.

The Senta mobile hoist comes with an integrated manual emergency lowering system, 3 year warranty* and provides a safe, flexible and cost effective patient handling system for a stress free bathing experience.

With a range of options such as side stretcher wings, side rails and integrated calibrated patient scale, the Senta mobile hoist is able to fulfil a range of patient handling and manual handling tasks.
