

# Biobidet pre installation checksheet

## Requirements

This product is supplied with a three-pin earthed plug complying with BS 1363 which must be plugged into a three pin earthed power socket(220-240V AC, 50-60Hz) and protected by a residual current device(RCD).

The rated power consumption is 600-700W.

If this product is used in a bathroom or shower room, the supplied plug must be cut off and the connection to the power supply must be made via a switched fused spur and RCD.

No other appliance should share the spur with this product.

The work must be carried out by a qualified electrician.

The use of an extension cord is not recommended.

Consult a qualified electrician if you are unsure whether the unit is properly earthed.

If repair of the cord or replacement of the plug is necessary, this should only be carried out by a competent person.

If in any doubt about the correct wiring of the plug, an electrician should be consulted.

The manufacturer and distributor cannot be held responsible for damage or injury resulting from the use of this product on other than specified voltage or without proper earthing.

Water supply pipework must be exposed and accessible. If we are unable to install the equipment, a return visit charge will be made for Installation visits where the services do not comply with this sheet.
