

The free standing **Avero adjustable height bath** is the latest generation of patient handling baths with bariatric capacity.

This beautifully designed specialist tub has been sculptured to give the maximum internal size with minimum external length, giving the client plenty of room to move.

This contemporary, elegant, timeless and ergonomically designed bath will accommodate all types of Astor-Bannerman mobile/ceiling hoists, internal supports and cushions to benefit all clients' needs. If using with a hoist, the unique patented Astor-Bannerman Neatfold drying and changing stretcher can be added to the Avero bath. This enables additional client care to be carried out without unnecessary transfer, whilst the heat from the bath keeps the client comfortable and warm.

The double tub thickness with insulation layer helps maintain water temperature and the bath can be shortened for individual clients using an optional footboard which can be slotted securely into 3 different positions. Premium, chrome brass grab handles can also be added if required to assist with user comfort.

As with most Astor-Bannerman assisted baths, the Avero has a 3 year warranty* for complete peace of mind and a wide range of thermostatic mixer tap options including WRAS approved gantry shower if required. A warm air spa can be added which gives a relaxing massaging effect along with an aromatherapy system if desired along with colour changing LED lights and an integrated Bluetooth speaker system to help stimulate the senses giving the ultimate bathing experience.

The Avero is also available as a standard *fixed height* bath in 2 different heights of either 650mm or 750mm.

The Avero baths are also available in almost any colour, so let your imagination go wild and try something new!
