

The Astor-Bannerman Carlo mobile hoists are available in both Classic & Comfort models and are specifically designed for day to day patient handling issues with ergonomic lifting position for client comfort and dignity.

Both the Carlo Classic and the Carlo Comfort have a safe working load of 185kg (29st) and are available as bariatric capacity models accommodating up to 230kg (36st) covering a wide range of care needs in a variety of settings.

The **Carlo Classic** comes with a curved 4 point spreader bar which is compatible with loop slings. The **Carlo Comfort** has a 4 point spreader bar with electric client positioning system and 360° swivel, unique patented anti-rotation lifting arm mechanism to prevent accidental rotation, and is compatible with clip slings.

The frames of the Carlo hoists are constructed from a combination of aluminium and stainless steel, making them incredibly lightweight, easy to manoeuvre and ideal for use in wet rooms and bathrooms. These battery operated hoists are durable and easy to use with powered spreadable legs (540mm closed / 700mm open), ergonomic grip position and 4 dual closed castors (2 lockable), designed to give an even transfer and prevent clogging with carpet fibres or debris.

With a long and spacious arched lifting bar, the Carlo can easily be positioned close to beds, chairs and baths, and lowers to ground level to safely lift from the floor in the event of a fall. The handset control also has a convenient display showing the battery charge level, failure diagnostics and service/maintenance notification.

There are a range of optional extras such as spare batteries, digital weighing scales, clip and loop slings in a range of sizes.

The Carlo Mobile Hoists are ideal for use in Changing Places facilities where a Ceiling Track Hoist is unachievable and all models come with a 3 year warranty* with a range of LOLER and service options available upon request.

Carlo Classic Mobile Hoist

4 Anti clog double castors)
for smooth movement
