

At Astor-Bannerman, we manufacture a range of padded cushions which can be used in any standard or specialist bath and our **head cushions** help to make bath time a little more comfortable and give precise positioning and comfort to the bather.

These head cushion supports are available in two shapes, half-moon (HS25) or triangle (THS20) and are made from a waterproof vinyl material filled with small polystyrene beads.

Triangular Head Support Cushion (THS20)

Both head cushions are easily secured to the bath with waterproof suckers, and each has a hand vacuum pump attached which, once the bather is in position, is used to remove the air creating a firm, flexible and comfortable support for optimum stability.

As with our full body support cushions, every head cushion comes with a warranty document and user guide with comprehensive instructions to follow to maintain the cushion lifespan. We can also offer these cushions to Occupational Therapists on a sale or return basis are also happy to demonstrate these to you at no extra cost.

All of this is our standard Astor-Bannerman offering which sets us apart from other suppliers.

We want to ensure that you have the right equipment and know how to get the most from it.

Strong suckers hold all cushions securely in place

Small handheld pump and valve to extract air
