

The **Motion height adjustable and reclining bath** is a fresh approach to stylish, comfortable bathing offering a safe experience for the client and understanding the needs of the carer.

The Astor-Bannerman specialist design team worked closely with therapy and care professionals to enable us to combine a contemporary appearance with practical performance keeping the needs of the client and care giver paramount.

Only one carer is needed to operate the Motion bath and safely control all the functions. The carer can easily open/close the door, adjust the height of the bath and perform the reclining motion for easy access and positioning making it simple to operate.

The large foot well area can be pre filled with 98 litres of water so the bather is comfortably immersed when the bath is reclined into a horizontal position. Filling at approximately 66 litres per minute and draining at 75 litres per minutes makes the Motion bath perfect for saving time without compromising on care and comfort.

The Motion bath boasts a spacious and ergonomic design with flat, smooth door opening with low entry height, and is compatible with any stand aid, floor hoist or ceiling hoist as well as self-transfer for more mobile clients.

External dimensions of the Astor-Bannerman Motion bath are much smaller than similar care baths on the market saving up to 500mm in floor space without reducing internal dimensions. The Motion is free standing so can be positioned anywhere in the room to change the view if desired and is exceptionally comfortable and supportive. The easy to clean edges and seat opening also ensure the ultimate in hygiene control.

The Motion has a range of optional extras including soothing chromo therapy colour changing LED lights, massaging warm air spa (with or without an aromatherapy system) and integrated Bluetooth speaker system to help stimulate the senses. It's also available in almost any colour to suit settings and care needs.

Compatible with mobile and ceiling hoists

Large lightweight door with contoured seating area
