Coronavirus Disinfectant Statement

There a number of disinfectants where their efficacy has been extrapolated to be able to state that they are effective against Coronavirus. We are using a surface disinfectant called Chemgene HLD4 for which the manufacturer Medimark Scientific Ltd has made that extrapolation and statement.

Mark Colebrook

Managing Director

Chemgene Surface Disinfectant – Coronavirus

STATEMENT FROM MEDIMARK SCIENTIFIC LTD

"We can comfortably state that **CHEMGENE HLD4** is effective against Coronavirus on the following basis:

CHEMGENE HLD4 has been tested against other Group IV positive sense single strand RNA viruses under the EN14476 test protocol (such as Caliciviridae), but also Vaccinia Virus the standard reference organism for enveloped viruses.

Therefore it is reasonable to infer efficacy against Coronavirus using CHEMGENE HLD4 and ANIGENE HLD4 according to the test results achieved."

R. J Hayman
Managing Director
MEDIMARK SCIENTIFIC LTD
